b) Water supply to the Military Camp at Haveluy

File No 55 of 1941 | General and Revenue Secretariat

Serial No

In regard to the period of supply i.e. between 1 A.M. & 5 A.M. also, no stipulation can perhaps be made now, as the camp would require water at any time of the day and it would perhaps be possible to store such a large quantity, however by a storage tank might be

21) About the rate of supply, the M.E. had stated that it might be charged for at 12 as per 1000 gallons. It has however been communicated in the questionnaire that 8 as per 1000 gallons would be a reasonable rate. It may not perhaps be expedient to increase the rate now to 12 as per 1000 gallons, especially as Haverluy is being supplied at 5 as per thousand gallons. 'Q'

In the circumstances, the Resident will be informed that arrangements may be made to pay to the Dastampara Panchayat at the rate of 8 as per 1000 gallons of water supplied to the Military Camp at Haveluy & the D.C. Chatterjee Distt. informed that it is not possible to restrict the quantity of supply to one lakh of gallons per day and also fix the time of supply during the day

1255/2 Supply of water to the Military Camp (5 at Nandan

General and Revenue Secretariat | File No. 75 of 194 / | [App F III-2

Serial No.

'H' (2) There are two points for orders on this file. (1) The Director of Public Health requests formal sanction of Govt to the supply of water at 1,50,000 gallons per day to the Military Camp at Nandan for a period of two months. This may be accorded

'B' (2) The D.C. Chittagong Distt requests orders of Govt on the resolution of the Darwaraque Committee to the effect that a supply not exceeding 1,00,000 gallons per day may be given temporarily for two months during slack time between 1 A.M. & 5 A.M. at 12 as per thousand gallons. In regard to this point, it may be stated that we have already intimated the Resident that it would be possible to supply 1,50,000 gallons per day for two months. Hence we cannot go back upon the promise thus held out and now say that we could supply water not exceeding 1,00,000 gallons per day

Re Supply of water from Davenagere Water Works at Harihar to the Defence Department

---

Sir

In continuation of this office letter No C 30-4 dated 4th April 1942 on the above subject, I have the honour to enclose herewith for the information of Government, a copy of letter No 1713 dated 19th May 1942 of the Sanitary Engineer opining that it is not desirable to bind ourselves to supply 200,000 gallons per day permanently until the duration of the war since the conditions of supply to Davanagere Town are not quite satisfactory Copies of the enclosures referred to in the Sanitary Engineer's letter and of his No 3504 dated 17 4 42 on the subject are also enclosed

I have the honour to be,
Sir,
Your most obedient servant,

Director of Public Health

Letter No 1713 dated 19th May 1942 from the Sanitary Engineer Bureau of Sanitary Engineering, Bangalore, to the Director of Public Health in Mysore, Bangalore

---

Subject - Water Supply - Harihar

In enclosing herewith copy of letter No 40213/44/E4 dated 15th May 1942 received from the C R E Madras District, Bangalore, I have the honour to invite your kind reference to this office letter No 1580 dated 17th April 1942 with which a copy of my letter No 3504 of even date to the Secretary to Government, Public Works Department with all copies of enclosures, was submitted to you for information It has been stated in that letter that the Defence Department should be accommodated with about 200,000 gallons of filtered water per day for a period of 2 months after their water supply distribution line is all completed This report was based on the fact that in its letter No 40213/12/E4 dated 9th April 1942(copy enclosed) the Defence Department has definitely intimated that the water supply from the Harihar installation would be required only as a temporary measure i e , for about two months as personally intimated by the A C R E

Under the above circumstances, the present enquiry as to whether water can be made available as a permanent measure cannot be made clear I wish, anyhow, to state that it is not desirable for us to bind ourselves to supply 200,000 gallons per day permanently and until the duration of the War since the conditions of supply to Davanagere town are not quite satisfactory The Davanagere Municipal President will also have to be consulted in the matter

Copy of my reply to the C R E is also enclosed for favour of your information Since the matter is very urgent, I have also submitted a copy of this letter to you, to the Secretary Public Works Department, for his information

---

---

Water Supply - Harihar

Ref - Our No 40213/36/E4 dated 4th May 1942 and copy of duly completed questionnaire from Government of Mysore

---

In answer to Question 1 and 2 the Government have not stated that supply is temporary only

This has led to a question by the higher authorities therefore, will you please confirm that the supply is temporary or permanent i e , for the duration of war - so that I may proceed with M E S installation Please reply by return

---

Letter No 40213/12/E4 dated 9th April 1942 from the Commander Royal Engineers, Madras District, Bangalore, to the Sanitary Engineer, Bangalore

---

Temporary water supply for military purposes from Davanagere water supply station at Harihar

---

Ref - Your letter No 3658 dated 4 4 1942

I corfirm that the supply from your station is only required as a temporary measure As soon as the necessary machinery is installed by me the Military Station will be a self contained and independent unit

O Gauramma

Director of Public Health

Letter No 3504 dated 17th April 1942 from the Sanitary Engineer, Bangalore, to the Secretary to Government, Public Works Department, Bangalore

---

Subject - Supply of water from Davanagere Water works at Harihar to the defence department

---

With reference to your telephone message of yesterday's date stating that enquiries have been received from the Defence Department with regard to the above and requesting me to meet you today with answers to the questionnaire furnished already by the Defence Department direct to me, I have the honour to enclose herewith replies to the questions raised therein Full information will be available from my replies to the questions raised I inspected Harihar water works on the 9th instant and I have given urgent instructions to the Assistant Engineer, No 4 Sanitary Sub Division, Chitaldrug to push through the work and complete the erection work He promised to have it ready within about 15 days' time i e , about the 25th instant He has again been reminded in the matter At the time of inspection, the high lift pumping set was practically completely installed, but the low lift set erection was yet to be started The electrical department is to take up and complete the interior wiring urgently, if the Electrical set can be put to use Two estimates for Rs 2,082-12-0 and Rs 1,016 have been countersigned and sent to the General Superintendent, Cauvery Power Scheme, Bangalore, for urgently taking up the work

I met the municipal President, Davanagere and explained to him the necessity for accommodating the Defence Department with about 200,000 gallons of filtered water per day for 2 months

It is to be stated that the pumping installation is under the direct management of the Davanagere Municipality and the establishment is being paid by them direct The pump installation work is undertaken by this Department and as soon as it is completed it will be handed over again back to them

---

"Copy" O Chamier

for Director of Public Health

Regarding Davanagere Water Works to
Defence Department

---

ation Details	The Station has two filters one 12' diameter and the other 17' diameter, the complete capacity being 12,000 and 21,000 gallons per hour, total 37,000 gallons per hour Based on this filter capacity the total available q uantity of filtered water per day of 21 hours is worked out at 693,000 gallons The demand for Davanagere being kept 500,000 gallons the Defence Department wishes to have a supply of 200,000 gallons of filtered and chlorinated water spared to them for a couple of months It is to be stated that the pump capacity is the deciding factor and not the capacity of the filter units The high lift pump capacity at present is 25,000 gallons per hour and with 21 hours work per day it is 525,000 gallons which will just meet the requirements of Davanagere and Harihar towns with a population of 45,000 people
Can this amount be spared for the Defence Camp?	This amount cannot be spared since the full high lift pump capacity will be utilised for the Davanagere town water supply As soon as the electric units are installed the raw water supply will be augmented but the limit of filtration from the 2 filter units which will be deciding factor will permit of about 150,000 gallons of filtered water being made available It is therefore essential to rush with the electrification if the installation should be used by the Defence Department
If so what rate for 1000 gallons	A rate of Rs 0-8-0 per 1,000 gallons // seems reasonable
If so, what rate, where and what pressure can it be given	At the pump house at about 375' head
Would the Company be prepared to install additional plant to deliver water to the Camp?	No
If not, could the Defence Department make its own arrangements for the pumping by installing machinery at or near the water works?	Yes There is one suction well at Harihar water supply which has now been abandoned The Defence Department can make use of this and arrange to instal necessary machinery for pumping the water from the suction well Anyhow, prior permission from the municipality would have to be obtained
If they may, how much electrical energy is available for the water works pumping tation sub-station at 3 phase volts 25 cycles	The Electrical Department may kindly be consulted in the matter The present line is 3 phase, 13200 volts On local enquiry it was ascertained that the present line from Bhadravati would not permit of extra pover being made available for this special pumping unit proposed by the Defence Department

8	Could land near the Dak Bungalow be made available for a filtration plant - settling tank if pure water cannot be given but only raw water	On left side of Dak Bungalow the said settling tanks, and filters can be located The Chief Engineer in Mysore, would have to be consulted in the matter, of permitting this filter units being put in the Travellers Bungalow premises
9	Could there be any difficulties over running a pipe line through Harihar village to the site?	There does not seem to be any difficulty in running the pipe line The Deputy Commissioner, Chitaldrug District would have to be consulted
10	There is a sub station in harihar near the hospital at which presumably the high tension line pressure is 13200 volts 3 phase	Yes
11	Could this line be extended to the camp site to give between 100 to 150 K W of energy for lighting and Power?	The Electrical Department would have to be consulted in the matter From the local enquiry at Davanagere it was ascertained that no extra power can be made available
12	If not how much could be given?	

Sd C R Iyengar,
Sanitary Engineer

Letter dated 4th February 1943 from the President Town Municipal Council, Davangere, to the Sanitary Engineer Bureau of Sanitary Engineering Bangalore

---

Subject - Supply of water to the Deference Department at Harihar

---

With reference to the correspondence ending with your letter No 1033 dated 23-12-1942 conveying the order of Government on the above subject, I have the honour to state that as per instructions, water to the Military Camp from the Davangere water works is being supplied regularly with effect from - 14-11-1942 and the period of 2 months contemplated in the Government Order has now expired

As the motors are working continuously for all the 24 hours for the past 2 months, they are getting overheated and are liable to breakdown Moreover it is not safe to work the pump sets without rest indefinitely Besides the Harihar - Municipality is asking for extra supply of water and it is - found very difficult to meet their demand

In the circumstances the Military authorities may kindly be informed to make their own arrangements early and the matter brought to the notice of the Government

WATER SUPPLY - HARIHAR

Ref Your Memorandum No R & P 71-42/Pol dated
17th March 1943

Military Pumping station and connected water works at Harihar have been completed and water is being supplied to troops from our Pumping station Water supply from the Davangere Water Works, Harihar is not required at present but supply will be required should there be a failure in the Military Pumping Station

42/

lly
les

The Mysore Government may be requested to supply water to the Military from the Davangere Water Works whenever there is a failure in the Military Pumping Station on request from the Garrison Engineer, Harihar

As we have Electric and Engine driven sets it is not anticipated that we shall require this supply at all frequently and then only for a short period

NOTE—Cont Sheet

Letter No EDS 4015 dated the 2nd June 1942, from the Secretary to Government, Electrical Department, Bangalore, to the Secretary to the Hon'ble the Resident in Mysore, Bangalore

---

Subject:- Supply of power for the Military camp near Harihar for water supply etc , - Answers to questionaire in connection therewith

---

I am directed to refer to your letter No R . 71-42/ Pol dated the 23rd May 1942 enquiring whether the water supply to the military camp near Harihar is temporary only or for the duration of the war and to state in reply that it will be possible to supply 150,000 gallons per day for a period of two months only by which time, it is hoped that the military authorities will be able to make their own pumping arrangements
